Profile

Highly experienced Senior Web Developer and Full Stack Software Developer with over 7 years of proven success in designing, developing, and deploying robust web applications. Expert in both backend and frontend technologies, specializing in **PHP** and frameworks such as **Laravel, Laravel Livewire, CodeIgniter, Node.js**, and **Symfony**, along with hands-on expertise in **RESTful API** design and scalable architecture.

Proficient in frontend development using **React JS, JavaScript, TypeScript, jQuery, HTML5, CSS/CSS3**, and **Bootstrap3/4/5** to build responsive, user-centric interfaces. Skilled in working with databases including **MySQL, PostgreSQL**, and **MongoDB**, with strong command over optimization and complex query handling.

Experienced in integrating modern tools and workflows including **GitHub, Bitbucket, Jira, Postman, Docker**, and **CI/CD** pipelines. Adept at cloud deployment and management using **AWS (EC2, S3)** and **Firebase**. Known for writing clean, maintainable code and implementing best software engineering practices.

Also Experienced in **AI-powered application development** through **OpenAI API integration**, enabling intelligent chatbots, content automation, and smart SaaS functionalities that enhance user engagement and efficiency.

Recognized for excellent problem-solving skills, strong analytical thinking, and the ability to lead and mentor development teams. Committed to delivering high-quality, scalable, and performance-driven web solutions that align with business objectives and enhance user experience.

Employment History

○ Senior Web Developer February 2023 - Working Now - Designed, developed, and deployed high-performing web applications using PHP and frameworks such as Laravel, CodeIgniter, and Symfony, ensuring scalability and maintainability. - Built and optimized RESTful APIs for seamless integration between frontend and backend systems, enhancing application performance and reliability. - Developed dynamic and responsive user interfaces using React JS, JavaScript, TypeScript, jQuery, HTML5, CSS3, and Bootstrap3/4/5. - Worked extensively with MySQL, PostgreSQL, and MongoDB, focusing on query optimization, data consistency, and efficient schema design. - Collaborated closely with product managers, designers, and QA teams to translate business requirements into technical solutions and deliver projects on schedule. - Integrated OpenAI APIs to develop intelligent automation features, chatbots, and AI-driven functionalities that improved user engagement and operational efficiency. - Implemented CI/CD pipelines for automated deployment, testing, and version control using GitHub, Bitbucket, and Jira, ensuring streamlined development workflows. - Maintained and deployed applications on AWS (EC2, S3) and Firebase, ensuring high availability, scalability, and secure data storage. - Ensured code quality through rigorous testing, documentation, and adherence to best practices and coding standards. - Troubleshoot, debugged, and optimized existing applications to improve performance, enhance user experience, and reduce technical debt. - Collaborated with cross-functional teams to implement new modules, integrate third-party APIs, and modernize legacy codebases. - Provided technical guidance and mentorship to junior developers, promoting knowledge sharing and fostering team growth.	ProProfs Delightfully Smart Tools
○ Senior Software Developer July 2021 - February 2023 - Developed databases, programs and processes for integration and implementation across enterprise. - Trained new developers and programmers on company standards for design and review. - Coordinated efficient large-scale software deployments. Provided technical support using knowledge of complex technology to solve problems and support new projects. - Discussed project progress with customers, collected feedback on different stages and directly addressed concerns. - Coordinated with project management on database development timelines. Designed reusable and reliable code for use within distributed cloud environments - Developed software for web and mobile operating systems. Updated old code bases to modern development standards, improving functionality	Cyber Matrix Solution Pvt. Ltd.

Senior PHP Developer February 2021 - July 2021 • Provided front-end and back-end website development using PHP, Laravel, and other codeing languages. • Determined coding requirements for specialized scripts. • Applied emerging technologies to update and maintain site applicability. Developed user-friendly web forms with validation and error handling.	Sandstrom Infotech Pvt. Ltd.
Software Developer July 2019 - February 2021 • Revised, modularized and updated old code bases to modern development standards, reducing operating costs, and improving functionality. • Collaborated on stages of systems development lifecycle from requirement gathering to production releases. • Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development. • Tested and deployed scalable and highly available software products. Built databases and table structures for web applications.	Horizon IT Consultancy Services Pvt. Ltd
Web Application Developer November 2018 - June 2019 • Applied emerging technologies to update and maintain site applicability. Designed, implemented and monitored web pages, plugins and functionality for continuous improvement • Analyzed user requirement reports to design web applications to meet customer needs, as well as legal and budgetary restrictions. • Developed web application using pre-made user interface frameworks such as Material UI, HTML and CSS.	Airis Foundation

Education History

MCA, Master Of Computer Application 2019 - 2022	Swami Vivekanand Subharti University Meerut
BCA, Bachalor Of Computer Application 2016 - 2019	Dr. C.V. Raman University, Chhattisgarh, Kota
I.Sc, Intermediate Of Science 2014 - 2016	Inter Science College Hazaribagh
Matriculation, JAC Board 2013 - 2014	Upgraded High School Gosain Balliya

Technical Skills

PHP and Frameworks

Experienced in PHP development with expertise in **Laravel**, **Laravel Livewire**, **CodeIgniter (CI)**, **CakePHP**, **Symfony**, and **Node.js** for building scalable backend systems.

LMS & E-commerce Platforms

Skilled in developing and customizing **LMS and E-commerce solutions**, including admin panel enhancements, theme customization, plugin integration, and scalable backend functionality.

HTML, CSS, and jQuery

Strong in **HTML5**, **CSS3**, **SASS**, and **jQuery** for responsive UI development, accessibility, and cross-browser compatibility.

JavaScript Ecosystem

Proficient in **JavaScript (ES6+)**, **TypeScript**, and **React.js** for dynamic frontend development with component-based architecture.

Cloud & DevOps

Hands-on experience with **AWS (EC2, S3)** and **Firebase**, along with CI/CD pipelines using Git, GitHub Actions, and automation tools.

Database Technologies

Expertise in **MySQL**, **PostgreSQL**, and **MongoDB**, with solid understanding of database architecture, performance tuning, and query optimization.

Version Control & Tools

Skilled in using **Git**, **GitHub**, **Bitbucket**, **Jira**, **Postman**, and **VS Code** for modern development workflows and collaboration.

API & Webhooks

Experienced in building and consuming **RESTful APIs**, developing custom webhooks, and integrating third-party services and CRMs.

Interests

- Web & Software Development
- UI/UX Enhancements and Performance Optimization
- Exploring Emerging Technologies (AI, DevOps, Cloud)
- LMS, E-commerce Platforms, and Plugin Development
- Watching Thriller & Sci-Fi Movies
- Participating in Hackathons and Coding Challenges
- Learning New Programming Languages and Frameworks
- Gaming and Problem-Solving Puzzles

Soft Skills

- **Leadership:** Skilled in guiding and motivating development teams toward achieving technical and business goals.
- **Responsibility:** Reliable and accountable in managing projects, meeting deadlines, and ensuring code quality.
- **Teamwork:** Collaborative and respectful, able to work effectively across cross-functional teams in Agile environments.
- **Adaptability:** Quick to learn new tools, frameworks, and methodologies in dynamic and fast-paced work environments.
- **Communication:** Effective at conveying complex technical ideas to non-technical stakeholders in a clear and concise manner.
- **Self-Motivation:** Proactive and goal-driven, able to work independently and take initiative on new challenges.
- **Problem Solving:** Adept at analyzing issues, debugging, and implementing efficient solutions under pressure.
- **Decision-Making:** Capable of evaluating trade-offs and making informed decisions to move projects forward.
- **Mentoring:** Experienced in guiding junior developers, conducting code reviews, and sharing best practices.
- **Critical Thinking:** Able to analyze complex problems, evaluate multiple solutions, and make logical recommendations.
- **Creativity:** Innovative in designing efficient solutions, UI/UX improvements, and optimizing processes.
- **Time Management:** Skilled in prioritizing tasks and delivering quality work within tight deadlines.
- **Conflict Resolution:** Capable of managing disagreements professionally, fostering collaboration and team harmony.
- **Emotional Intelligence:** Attuned to team dynamics, able to motivate others, handle feedback, and maintain a positive work environment.

Career Objective

To secure a challenging and rewarding position as a **Senior Web Developer & Full Stack Software Developer** where I can utilize my extensive technical expertise and leadership skills to design, develop, and deliver innovative web solutions. With over 7 years of hands-on experience in both frontend and backend development, I aim to contribute to building scalable, efficient, and high-performing web applications using modern technologies such as **PHP (Laravel, Laravel Livewire, CodeIgniter, Symfony, Node.js)** and **React JS**.

My objective is to drive excellence in software development through clean coding practices, architectural innovation, and performance optimization. I am passionate about integrating **OpenAI APIs** and other intelligent automation tools to develop next-generation SaaS platforms that enhance user experience and operational efficiency.

I seek to work in a dynamic and growth-driven environment where I can lead and mentor teams, collaborate with cross-functional stakeholders, and contribute to product innovation from concept to deployment. My goal is to align technical strategies with business objectives, ensuring that every solution not only meets client requirements but also adds long-term value to the organization.
